## **Installation - Joining Plates**

Joining Lengths with Joining Plates

EAL'N'ELE Apply a liberal amount of Polyurethane adhesive/sealant into supplied joiner plate. Check Australian standards and Material Data Sheets for more information. Diagram of recommended join sealing method. A sufficient amount of SupaSeal or similar (see above) should be applied to cleaned surfaces (use Acetone or similar). It is advised that joins are fixed with rivets in addition the sealant, ensuring that the holes are adequately covered with sealer. For best wear and warranty, follow manufacturers advice and Material Data Sheets.
